I continued to experience breakouts with lumps and can not stop itching. I've continued to sign-up for sick call, or stop by sick call during mainline and speak with medical staff on a weekly basis. Recently, I wrote to Warden Sage, Complaining About the medical neglect and suddenly I was prescribed Triamminolone acetanide cream. The cream is to strong for my face because when I used it, my face would burn. These conditions got worse after I used cream on my face.

I would like to be seen by a specialist and have an allergy test performed so I can find out what it is causing these bad effects. I saw PA Swabaski on Nov. 24, 2021 and explained again that I was still itchy and need a prednisone shot to stop the itching. She told me it was not an urgent matter and that the medical dept is understaffed right now. If the BOP can not provide adequate medical attention and care I should be released to home confinement so I can seek my own medical attention, at my own expense.

AGAIN I AM REQUESTING THROUGH THIS FORMAL COMPLAINT TO SEE DOCTOR: I have been lockdown quarantine /isolation for the last 35days, I have fill out sick call slips, spoke with numerous medical personnel about my conditions such as itching constantly, discoloring of my skin with rash bumps on top of rash on my face, legs, arms. For the last two weeks suck in my cell I have been feeling uncomfortable itching uncontrollably, scratching cant sleep cause of my conditions. I DONT UNDERSTAND WHY NO MEDICAL PERSONNEL CAME FOR SICK CALL TO CHECK OM MY CODITIONS. AS UNIT MANAGER RAUP, AM OFFICER ZOSH HAD TOLD ME FOR TWO WEEKS. This is clear neglect of medical attention i cannot jut walk to medical clinic here, i cannot just go to outside hospital to determine what this condition is. I am tire of my words falling on deaf ears, I AM under subject of this facility, so im in no position to choose my own health provider. This common practice to kick the can down the road is dangerous on all inmates health. Take our heath seroius, stop looking at us inmates as a number and as a human.

I have been constantly having a problem with the medical staff's neglect of my medical conditions. I'm having a allergic reaction for several months that I continue to bring to the medical staff's attention. I am having swelling on my cheeks. It may be from something I ate last night. I have no idea because they refuse to conduct any testing to see what I am allergic to. This morning I had the officer call down to medical so I can attend emergency sick call this morning and nothing happened. I just spoke with my health care provider Ms. Swaboski at mainline and requested to be seen today for this allergic reaction. She stated that I will not be seen today because it's not urgent. First, she has no idea what is causing these problems. So how will she know it is not urgent? When I can't breath? I have had this allergic reaction in early May after I received the covid vaccine. I have been dealing with discoloring on my skin, face, legs, and arms, and have went to sick call Aug. 10, Sept 2, Oct 20 and Nov 5th. I have been waiting to be seen and have labs taken to see if I'm allergic to something causing these bad reactions or if it is stemming from the vaccine. To date, nothing has been done. I spoke with Ms. swaboski last week at mainline and she said I will be seen eventually but it is not an urgent matter. They are understaffed and will get to me when they can. How much longer do I have to wait to be seen? Until I eat something and my windpipe closes like the last inmate they had to medevac'd out of here because of the lack of medical care. If the prison medical staff is understaffed and they can not provide care for the inmates then please consider releasing me to home confinement so I can secure adequate medical care at my own expense. I appreciate your consideration and attention with this matter.
